

## TRANSFORMER SERVICES

### Experience You Can Trust

When it comes to critical assets like power transformers, you can't afford to take any chances. Electric Power Systems International, Inc. has been providing our services to clients around the world since 1977. We're committed to promoting a culture of safety and reliability throughout all stages of a project. When it comes to your critical assets, you can trust EPS to get the job done.

### Here When You Need It Most

With a staff of on call service professionals that know your equipment, EPS is ready to help when it really counts. Our factory trained and NETA certified technicians are able to respond quickly with the right equipment to take care of any transformer related needs. Whether it is a leaking component, a failed bushing, or a full regasketing, we have you covered with our technical expertise and our fleet of top quality equipment, including vacuum oil processing rigs.

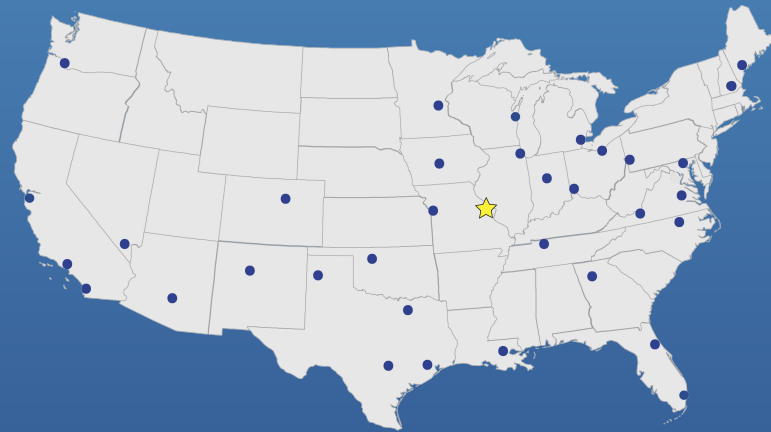

### One Source

Working with EPS gives you access to a team of experienced industry experts. EPS provides a total service solution with a single point of contact for coordination and scheduling. Whether you are performing regular maintenance, emergency outages, or expanding your facility, we've got you covered. And as a NETA certified, independent testing and engineering services company, you'll get qualified personnel and unbiased test results and recommendations, regardless of the manufacturer of your electrical equipment.
